

I am writing to you in regards to the proposal before the FCC concerning the expansion of LPFM stations that would allow LPFM stations to take priority over current FM translator service. KLove radio is a very vital part of my community. I have many friends and family that depend on this station being there as an alternative to other stations that they feel are not appropriate for their children. If KLove were to be displaced by this action, I believe the majority of us would switch off radios in the area. The ministry provided by KLove is not something that can be replaced..this ministry reaches those that are often unreachable. Many times I have heard testimonies on KLove about how a person was considering suicide, going thru a dark time in their life...when they turned on the radio and KLove was there, with it's positive message...and many times it saved them and comforted them. How could it better for the public interest for this radio station to disappear? It's not. Please do not let this expansion happen...we are counting on you. Thank you!
